### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 14 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 14 is directed to information **and** a medium. Since the information do not provide any functional interrelationship to the medium for controlling the medium to reading and access the information from the medium, or impart to any software and hardware structural components to perform a function that is processed by a computer, the information themselves can not make them statutory. See MPEP 2100. The recitation "the control information is provided .. the information recording/reproducing apparatus," at the last two lines of the claim is mere an intended use since there is no recitation in the claim to specify how the video management information file is read out and is interact with any means or circuit of the recording device or reproducing device to reproduce the still picture file. Further claim 14 directs to information and a medium not to an apparatus or a device.

It is suggested that "An information recording medium" line 1, needed to be changed to -- A recording / reproducing apparatus comprises an information recording medium -- to overcome the 101 rejection.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 is indefinite since it is not clear whether the audio information, still picture information, still picture additional audio file information and still picture VOB group information have been recorded on the medium or not. Therefore how the recording and/or reproducing apparatus can access and reproduce the still picture information and the still picture VOB group information video file and video recording manager information file is unclear. The recitation "configured to store" is not a positive recitation to point out that the still picture information, additional audio information and still picture VOB group information have been recorded on the medium.

Claim 15 is indefinite as being a hybrid claim. Claim recites a medium to store with information and method for recording the information however, claim do not provide any connection and support between a medium and method since the claim do not provide any steps of generating or forming the error correction block, video object data and control information.

Claims 16-17, the recitation "configure to store ..." in the claims is indefinite because it is not clear whether the information has been recorded on the medium or not, therefore it is unclear how the video file and management information file can be

reproduced from the medium. The recitation "configured to store" is not a positive recitation to point out that the information have been recorded on the medium.

For claims 16 and 17, last line, after "data area" needed to be added -- based on the reproduced control information --.
